# How to create your own folded chicken:

Follow the steps below or watch a video tutorial here:
https://www.youtube.com/watch?v=j4jk1IHqJV4

**1. Cut along the dotted line. Don't throw away the extra!**
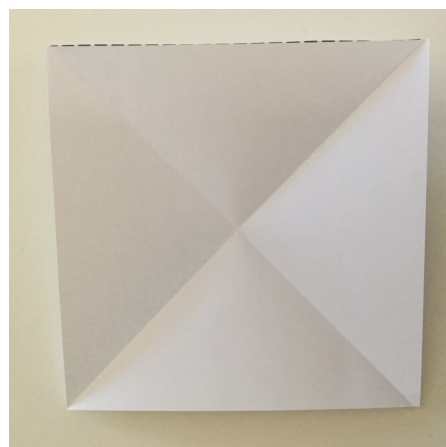

**2. Fold the square in half along both diagonals.**
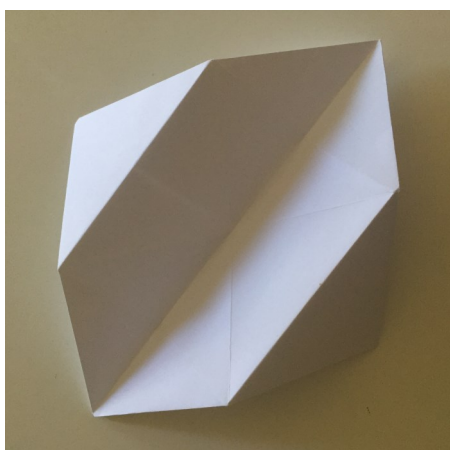

**3. Fold each corner into the middle.**

**4. Fold each corner into the middle, again!**
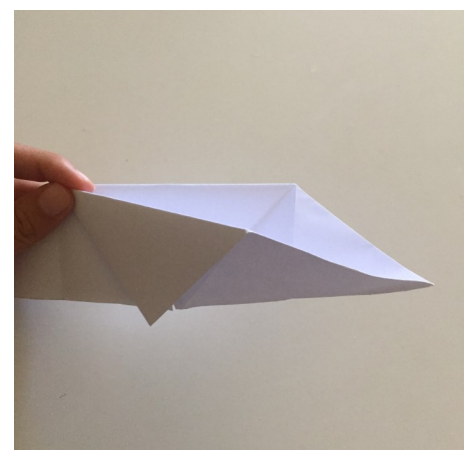

**5. Unfold the corners you folded in Step 4.**

**6. Flip your whole paper over.**

**7. Fold your paper in half along one diagonal.**
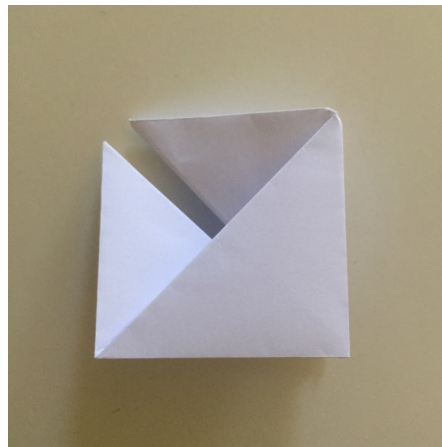

**8. Flatten out the fold from Step 7.**

**9. Pick up your paper and open up the point on just one side.**
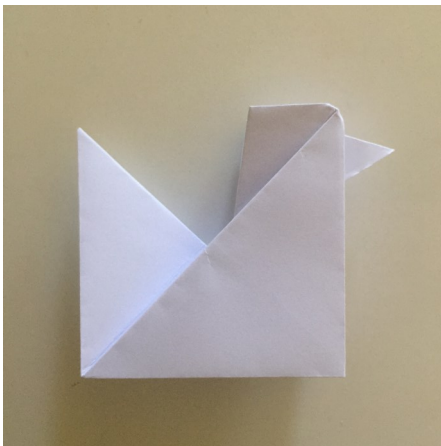

# How to create your own folded chicken (continued):

**10. Fold in the point you opened in Step 9, towards the middle.**

**11. Do the same with the point on the other end. The fold on the left is the tail; the right will be the head.**

**12. To make the head and beak, open up the fold on the right a little bit.**

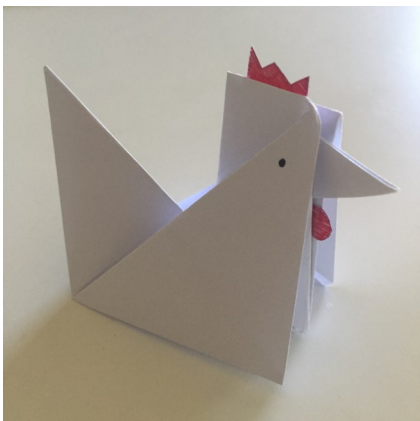

**13. Fold the point inside the fold from Step 11.**

**14. Gather the extra paper and draw a "comb" (for the top of the head) and "wattle" (for below the beak on the neck).**

**1. Cut along the dotted line. Don't throw this part away yet!**

**15. Tape or glue the comb and wattle to your chicken.**

**16. Add an eye on each side to complete your folded chicken!**
